

Diagnosed Prediabetes by County in Wisconsin

Behavioral Risk Factor Surveillance System (2011-2014 and 2016)

Data Source: Behavioral Risk Factor Surveillance System, 2011-2014 and 2016.
 Diagnosed prediabetes prevalence estimates are age-adjusted to U.S. 2000 Census.
 In 2015 the BRFSS Prediabetes Module was not administered.
 Menominee and Pepin counties exclude 2016 data due to small sample size.

34% of Wisconsin adults have **prediabetes**.

88% of those with prediabetes don't know it.

The map above shows only adults with diagnosed prediabetes.

Approximately 1.5 million Wisconsin adults have prediabetes, but 1.3 million are unaware.

Data Source: 2011-2014 National Health and Nutrition Examination Survey, National Center for Health Statistics, Centers for Disease Control and Prevention estimates for adults 18 and older applied to the 2014 Wisconsin population 18 and older.
