

2020

Calendar Year Report on Opioid Treatment Programs in Wisconsin

**WISCONSIN DEPARTMENT
of HEALTH SERVICES**

P-02115-2020 (03/2022)

In 2020, there were 22 clinics in Wisconsin that met the definition of an opioid treatment program under 42 Code of Federal Regulations, Part 8. An opioid treatment program is an accredited treatment program with Substance Abuse and Mental Health Services Administration certification and Drug Enforcement Administration registration to administer and dispense medications that are approved by the Food and Drug Administration to treat opioid use disorder. These medications include methadone and buprenorphine products. Other pharmacotherapies, such as naltrexone, may be provided but are not subject to certification and registration regulations. Opioid treatment programs must provide adequate medical, counseling, vocational, educational, and other assessment and treatment services either on-site or by referral to an outside agency or practitioner through a formal agreement.

The use of Food and Drug Administration-approved medications in combination with other supports to provide a whole-patient approach to services for opioid use disorder is known as medication-assisted treatment.

This report provides one-page summaries for each opioid treatment program. The summaries include the data points required to be reported to the Wisconsin Department of Health Services under Wis. Stat. § 51.4223. All opioid treatment programs also complied with requests to provide additional data.

Wisconsin opioid treatment programs are required to comply with Wis. Admin. Code § DHS 75.15 regarding the ratio of treatment program staff to the number of patients receiving treatment. If at any time the clinic is out of compliance with this requirement, they are placed on an admission hold until they come back into compliance with the ratio requirement. Each opioid treatment program has a plan for tapering individuals off methadone. The taper plan varies by individual and is based on their circumstances.

22

Opioid treatment programs
operated in Wisconsin in
2020

13,044

Patients served in
2020, an 8.5% increase
over 2019

2,870

Patients received concurrent
behavioral health services in
2020, about 22% of all
patients
