Deciphering a Patient’s Immunization History
in the Wisconsin Immunization Registry (WIR)

**Red text** = immunization was entered or administered by a provider and a reaction was documented.

**Yellow text** = immunization was entered by a school and has yet to be verified by a provider.

**Bold text** = immunizations that are part of a series.

**Double star** = immunization is considered incomplete.

**Double star and Red text** = immunization was entered or administered by a provider and a reaction was documented, and the immunization is considered incomplete.

Detailed column descriptions can be found on the back of this fact sheet.
### Vaccine Group
Displays the vaccine group the immunization belongs to.

### Date Administered
- For valid doses, clicking the date administered will display the intervals and age recommendations for the series.
- For invalid doses, clicking the date administered will also display the reason the dose was marked not valid.

### Series
- **X of Y**: X represents the dose number and Y represents the number of doses needed in the immunization vaccine group series. For example: 1 of 5 means this was the first dose of a five-dose immunization series.
- **Partial Dose**: The patient did not receive the full dose of the immunization and it should be repeated within the interval the WIR recommends.
- **NOT VALID**: The patient received an immunization that did not align with the routine age-based Advisory Committee on Immunization Practices (ACIP) schedule.
- **Booster**: The patient has completed their primary immunization series and has received booster doses per ACIP recommendations for the immunization series.

### Trade Name (Vaccine)
- The trade name of the immunization will populate in this field.
- If the trade name field is blank, this means the trade name of the vaccine was unknown, likely due to historical entry.

### Dose
- **Blank**: The immunization administered did not come from the active inventory module in WIR and therefore the dose size was not populated.
- **Half**: The patient received half of the normally recommended dose size for this immunization.
- **2**: The patient received double the recommended dose size for this immunization.
- **Full**: The patient received the recommended dose size for this immunization.

### Owned?
- **Blank**: Your organization entered and/or administered the immunization and has the ability to edit the immunization in WIR as necessary.
- **No**: Your organization did not enter and/or administer the immunization and cannot edit the immunization information in WIR.

### Reaction
- **Yes**: A reaction was recorded for this immunization and if clicked, will display the reaction documented.
- **Blank**: A reaction was not recorded for this immunization.

### Hist?
- **Yes**: The immunization was recorded as being historical.
- **Blank**: The immunization was administered by the organization that entered it.

### Edit
- Click the pencil and paper icon for a given immunization to edit the information.
- An immunization can only be edited if your organization is the owner or if it was entered historically.
