Source: Office of Health Informatics, Wisconsin Department of Health Services
Data: Wisconsin Ambulance Run Data System (WARDS)

These data include all ambulance runs within Wisconsin coded as 911 responses for individuals aged 11 years and older; medical transports and other nonemergency transports have been excluded. Data are determined from free-text fields via key words of interest and exclude visits that appear to be related to withdrawal, detox, or intentional overdose. These cases have not been confirmed by clinicians.

(Figure suppressed for counties with <5 suspected overdoses in the month)

### Figure 2. Waupaca County Suspected Opioid Overdoses by Month, YTD

1These data include all ambulance runs within Wisconsin coded as 911 responses for individuals aged 11 years and older; medical transports and other nonemergency transports have been excluded. Data are determined from free-text fields via key words of interest and exclude visits that appear to be related to withdrawal, detox, or intentional overdose. These cases have not been confirmed by clinicians.
