

Peer Specialist Initiative

DATA BRIEF #3: Training Experience Satisfaction Data

Overview

This data brief reviews the data from

557 surveys

From courses offered from January 2017 through January 2019

The seven scaled questions were all positively worded with answer choices of:

Strongly Disagree - Disagree - Agree - Strongly Agree

Summary

95%

Of peers were satisfied with their training across all questions

Peers were **most satisfied** with:

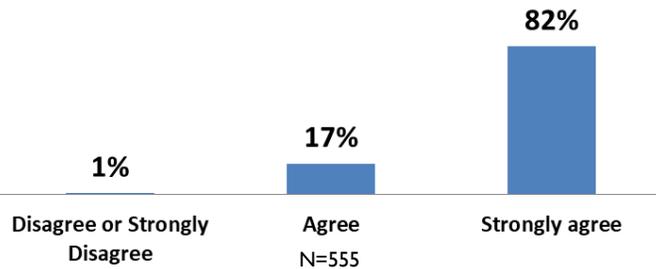

- Ability of trainers to **relate to key concepts** in useful ways.
- Availability of trainers to **discuss concerns**.
- Ability of trainers to provide a **safe environment** for group discussion.

Peers were **slightly less satisfied** with:

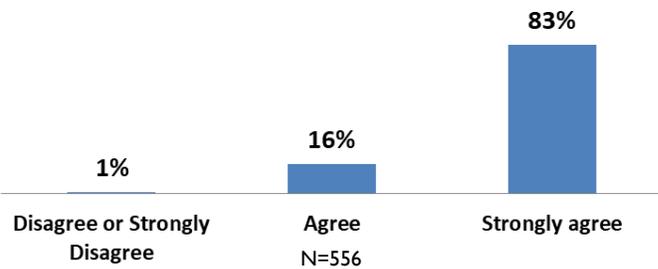

- The **way material was presented** for their learning style.
- Their request for an **accommodation** for a disability being honored.
- The **balance between activities and lecture**.
- Their **engagement** throughout training.

Scaled Questions

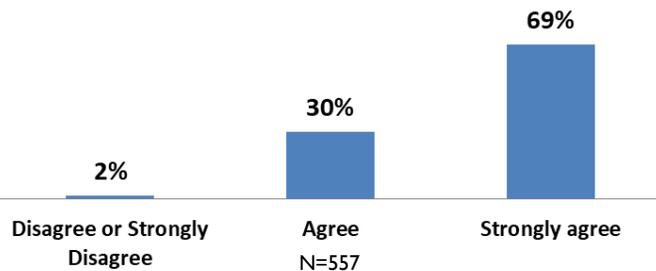

Trainers were able to relate key concepts and information in useful ways.

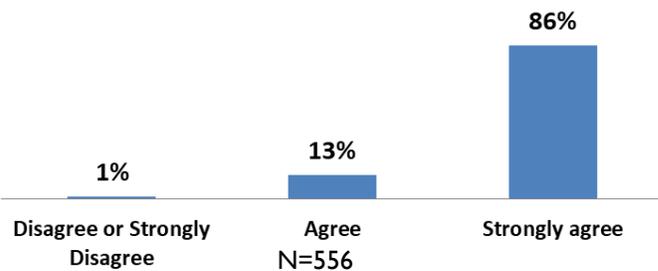

Trainers made themselves available to discuss concerns I had during training.

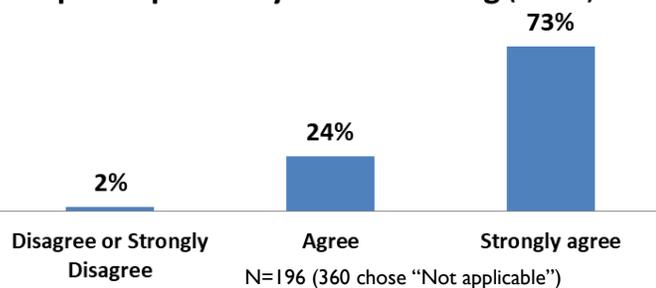

Trainers presented the information and materials in a manner that was appropriate for my learning style.

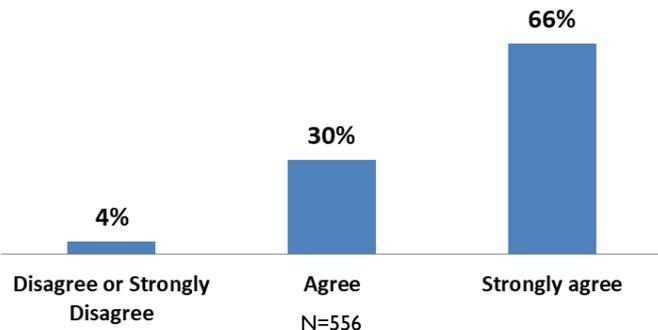

Trainers provided a safe environment for people to participate in group discussion.

My accommodation request was honored in a way that allowed me to participate fully in the training (n=196).

Training was well balanced between lectures and activities.

Trainers kept me engaged throughout the training.
