I live with someone who was never sick, but was diagnosed with COVID-19

Are you able to have complete* separation from the diagnosed person in your home?

No

Released from quarantine:
14 days after the diagnosed person completes a 10-day isolation

Yes

Released from quarantine:
14 days after your last contact with the diagnosed person

*Complete separation means no contact, no time together in the same room, no sharing of any spaces, such as using the same bathroom.

If you are tested during your quarantine and the results are negative, **you still need to complete your full 14-day quarantine** before going back to work or being around others.

If you get sick, ask your doctor to be tested and please follow the guidance in “**Next Steps: while you wait for your COVID-19 test results**?”

You could have been exposed to COVID-19 at some point and not enough time has passed for the test to pick it up. **You may test positive at a later date.**
