

LEAD HAZARD
WORK AREA KEEP OUT
NO SMOKING, EATING, OR DRINKING

CAUTION: UNDER CONSTRUCTION

Lead Paint Renovation in Schools:

Help us keep you and your students safe.

Teachers and School Staff,

You're making our children smarter. **Lead paint renovation** is making them safer. Lead renovation helps to reduce lead paint hazards in schools, but any work on old paint can release **lead dust**.

Everyone can renovate right!

Lead-Safe Renovation Has:

- A **defined** work area.
- **Plastic sheeting** that encloses the area.
- **Signage** that warns you to avoid the area.

Scan the QR code to submit an anonymous tip.

Safety is our top priority. Reach out if you see...

- ⚠️ Dust or debris outside of a designated renovation area.
- ⚠️ Dust or debris in your classroom after renovations.
- ⚠️ Renovation work that isn't clearly marked.
- ⚠️ A renovation zone without plastic barriers.

Have questions or concerns about work being done?
