Introduction

This report presents key information about marriages and divorces that occurred in Wisconsin in 2001. It also contains information from selected previous years, as well as information on the

number and rate of marriages and divorces, both in Wisconsin and nationally. The sources of data for Wisconsin are marriage and divorce certificates on file with the Bureau of Health Information, Division of Health Care Financing, Department of Health and Family Services.

The collection of marriage and divorce data is mandated by Chapter 69 of the Wisconsin Statutes. Chapter 69 authorizes the Department of Health and Family Services to supervise and direct the collection of these data. This statute also specifies how local registrars are to collect and file certificates of marriage. Samples of the marriage and divorce certificates are included in the Technical Notes.

The Department of Health and Family Services produced this publication. Staff of the Vital Records Registration and Statistics Unit, Bureau of Health Information, collected and compiled the marriage and divorce records. Joyce Knapton drafted the summaries in this report and produced the computer programs to generate the tables. Patricia Nametz edited the report. The report was prepared under the supervision of Janet Heimbruch, State Registrar, Vital Records Section, and Lynnette Traas, Supervisor, Registration and Statistics Unit. Sandra Breitborde, Director, and Vonnie Buske, Deputy Director, Bureau of Health Information, provided overall direction.

The Bureau of Health Information would like to thank the County Clerks for issuing accurate marriage licenses and the local Register of Deeds offices for their accurate recording of all marriage records.

This report is also available on the Department of Health and Family Services Web site, at <https://www.dhs.wisconsin.gov/stats/marriages.htm>.

Note: The median age is one way of expressing the average age, and represents the midpoint of all persons in the group (half are older and half are younger than the median age). For example, in 1995 the median age for brides at first marriage was 24.5, meaning that half of all brides being married for the first time in 1995 were younger, and half were older, than 24.5. The numbers in this table reflect all marriages that occurred in Wisconsin in the stated years.

- The median age for first marriages in 2001 was 24.7 for brides and 26.3 for grooms. In 1960, the median age at first marriage was 20.4 for brides and 22.9 for grooms.
- Since 1960, the average bride in a first marriage has been approximately two years younger than the groom.
