PROFILE DESCRIPTION: The Wisconsin Partnership Community Impact Grant continues the ongoing WCCEAL collaboration to improve the outcomes of individuals living in Wisconsin assisted living facilities. The information below provides a summary of Association related responsibilities and duties associated with the five overall project aims which are described in greater detail within this work plan.

Aim 1. Reach: Ensure that residents of Wisconsin Assisted Living Communities (ALCs) have access to quality care by expanding the reach of the collaborative to engage more ALCs.

Aim 2. Infrastructure: Improve ALCs' ability to report and compare their progress and quality improvement by collaboratively updating the WCCEAL data infrastructure.

Aim 3. Disparities: Address health disparities in the state by assessing and targeting ALCs providing services to underserved populations.

Aim 4. Family Care: Reach more publically-funded and underserved residents through integrating WCCEAL into the Family Care Quality Strategy. Connecting ALCs to a tested quality improvement infrastructure will improve the overall quality of the long-term care system by focusing on achieving people's health and social outcomes.

Aim 5. Quality Improvement: Improve specific quality targets for ALCs by developing educational opportunities and/or processes that would allow for ALCs to work with their peers.

Aim 6. Dissemination: Produce and disseminate evidence to sustain positive systems change through this collaborative.
