**PROFILE DESCRIPTION:** DHFS Allowable Cost Policy Applies. CARS DMT-855 Expenditure Reports are required.

Reimbursable expenses include salary, fringe, supplies, agency operations and indirect costs.

General purpose is to provide maternal and child health services on a statewide basis. What follows is specific to Statewide Program to Improve Maternal Health and Reduce Disparities in Perinatal Outcomes. This program will address the need to improve key perinatal indicators in Wisconsin including prematurity, low birth weight, and infant mortality. An analysis of Wisconsin data identified high fetal/infant mortality rates related to very low birth weight and late fetal loss. Focusing on maternal health prior to pregnancy and maternal care during pregnancy are evidence-based strategies to improve birth outcomes. Goals include: a) Support the Maternal Mortality Review, b) Provide education on evidence-based practices to improve maternal health and maternal care, c)

Increase risk assessment and follow-up services for women of reproductive age, d) Promote use of folic acid among women of reproductive age.
