Trauma Care Facility Classification Site Review Introduction PowerPoint Outline

Below is an outline for topics and statistics that should be included in your introductory PowerPoint. Please limit your total PowerPoint presentation to **15 minutes or less**.

Introduction:

- Hospital facts
Provide the name, level, bed capacity, average census, RTAC, and any additional useful information.
- Area demographics
Describe the county or area that you are in and serve, including population, other hospitals (demonstrate referral pattern), and any other unique features of your area.
- EMS overview
Describe services and their levels, use of the helicopter within your system, and inter-facility transfer service.

Trauma Program:

- Registry facts
 - Volume of trauma patients
 - Activation numbers (break down at each level), admissions, transfers, deaths
 - Top three to five mechanisms of injury
 - Age distribution
 - ISS breakdown
- Injury preventions
List injury prevention programs you direct or participate in; include how it is data driven.
- Performance Improvement and Patient Safety (PIPS) Program
 - Explain your review process, including inpatient cases.
 - Describe key performance improvement projects.
- Improvements implemented from previous site visit
 - Explain the action(s) that were taken to correct criterion deficiencies and opportunities for improvements from your previous site visit.
 - If this is your first visit, please note recent areas of changes that you feel help you better meet the criteria.
- Strengths of your trauma program
