Background

The Title V Maternal and Child Health (MCH) Services Block Grant creates Federal-State-Local partnerships to develop state and local systems to meet the critical challenges facing women, children and families. States are required to use at least 30% of the Title V Block Grant funds for preventive and primary care programs serving all children; and at least another 30% of these funds must support programs for children and youth with special health care needs. Tribal agencies are in the most opportune position to work with community and state partners to improve and reach goals identified by the MCH Program.

Funding Per Tribe

MCH Contract: **Total:\$244,006** (GLITC=\$186,325; Potawatomi=\$18,528; Ho-Chunk=\$39,150)

Scope of Work Summary

Tribal agency self-selects one or more MCH Objectives--breastfeeding, safe sleep, developmental screening, adolescent suicide and, injury transportation-related injury. Each objective identifies specific strategies that the Tribal agency must implement. Strategies are evidence-based and evidence-informed. Resources and tools are available from statewide projects and partners who will provide technical assistance to agencies in implementing the required strategies.

Statewide partners include the following:

- Breastfeeding: WI Division of Public Health
- Developmental Screening: Children's Health Alliance of Wisconsin
- Suicide: Mental Health America of Wisconsin
- Health Equity
- Perinatal Depression
- Other TBD

Additional required activities include:

- Implement and evaluate effectiveness of the selected strategies and activities
- Collaborate with community partners
- Participate in quarterly Learning Community meetings/calls
- Promote Well Badger Resource Center <https://wellbadger.org>

Contract Period of Performance:

January 1, 2021 to December 31, 2021
