Background

The Immunization Program recently received a two-year grant (9/30/2015 through 9/29/2017) from CDC to work on increasing adult immunization rates in Wisconsin through collaborations with community health centers, pharmacies/pharmacists, health care systems/organizations, LTCFs, LHDs, tribal health clinics, immunization coalitions, and community-based organizations. Specifically, we will be working with tribal health clinics to increase adult immunization rates locally through optional adult immunization objectives. Tribal health clinics are encouraged to select an objective to work on during the contract period.

Funding Per Tribe

See tribal allocation spreadsheet

Scope of Work Summary

The goal of this funding is to increase adult immunization rates among the tribal population. To achieve this goal, each tribe will select an adult immunization objective to work on during the project period. See the "Template Optional Objectives for Adult Immunization" for suggested activities.

Period of Performance: May 1, 2016 – June 30, 2017

Reporting Requirements	Due Date
Select at least one adult immunization objective by replying to email	March 25, 2016
Complete negotiations in GAC	April 29, 2016
Mid-project report due	December 9, 2016
End of project report due	July 31, 2017
